Subject: Atlantic Coast Pipeline (ACP) 401 Permit Application

Dear Governor Cooper,

The Atlantic Coast Pipeline will be good for our communities, our economy, and our environment. Moving to more environmentally friendly sources of energy is vital for North Carolina, our region and our country. And the best way to do that is by approving the ACP.

The ACP will transport natural gas, which is already a much cleaner form of energy than older forms North Carolina has used for decades. And natural gas is an important partner fuel to renewables such as solar and wind. It is a natural complement for when the sun isn't shining or the wind is not blowing.

The gas transported by the ACP will be used to generate cleaner electricity to heat homes and power new industries creating Americans jobs. I urge you to approve the Atlantic Coast Pipeline.

Sincerely,

James McQuillan
